White Aluminium, Light grey.
All doors now available as
manually operated door.

GARADOR
The Garage Door People

The GaraRoll is an insulated roller garage door which is our latest addition to the Garador range of products. Its engineering excellence and quality craftsmanship let this door stand out from other products offered in today's marketplace.

At Garador, we're always committed to produce the best. We designed this brochure to show you the details of our roller door because we want you to make an informed choice.

Space saving construction in excellent quality.

**Limited
10 year Warranty**

GaraRoll insulated roller garage doors come with a door operator as standard. Both, door and operator feature innovative engineering details you have come to expect. In some situations where automation may not be required, therefore you can order a GaraRoll door for manual operation. GaraRoll doors are versatile and blend in with almost any homes architecture. Choose from our range of beautiful colours or go for the look of timber with our timber-effect finishes.

The aluminium laths are foam-filled, providing thermal insulation, stability and smooth, quiet door action. Their smooth surface finish inside and outside provides our GaraRoll door with its elegant appeal.

GaraRoll Green
(based on RAL 6005)

GaraRoll Red
(based on RAL 3003)

GaraRoll Black
(based on RAL 9005)

GaraRoll Brown
(based on RAL 8028)

GaraRoll Dark blue
(based on RAL 5011)

(based on RAL 7035)

GaraRoll White aluminium
(based on RAL 9006)

GaraRoll Anthracite grey
(based on RAL 7016)

Printed colour samples are as accurate as printing techniques allow.

Choose from the range of options to individualise your door

Foil-coated timber-effect surface finishes offer the natural appearance of timber whilst retaining all the cost and maintenance advantages of an aluminium door.

Foil-coated timber-effect, Rosewood

Foil-coated timber-effect, Golden Oak

Add a window for an individual design and the use of daylight in your garage.

Optional audible intrusion alarm with a sound of 110 db can be fitted to offer additional peace of mind.

opened

closed

The optional exterior door release is recommended when you do not have a second entrance to your garage. It allows you to operate the door manually from the outside in case of a power failure.

Hand transmitters are the most common and very convenient controls, and compatible across the whole Garador range of course. Transferring your operator's code to additional hand transmitters is easy.

Two hand transmitters as standard:

Hand transmitter mini (4-channel)

Hand transmitter micro (2-channel)

Hand transmitter (4-channel) // optional

Round mini transmitter (4-channel) // optional

Transmitter for cigarette lighter (1-channel) // optional

Innovative engineering

Also available as manually operated door!

The mechanical stop between the top lath and the barrel provides security by preventing the door from being lifted.

The soft start and soft stop our operator provides contributes to a long service life. Unlike other doors in today's marketplace, our operator does not limit the number of cycles in a residential application and does not require an additional closing edge safety device.

Our counterbalance springs complement the force limit of the operator, making an additional closing edge safety device redundant. The twin cables and spring-in-spring system also prevent the door from crashing down in the event of a cable or spring failure.

The door comes with windlocks as standard to secure the door in the guide tracks and to enhance protection from unauthorized access.

If required, our GaraRoll is very easy to operate manually. Unlike other doors using a cumbersome handcrank, you can operate our GaraRoll door by hand with no effort because the counterbalanced springs support the opening and closing cycles.

Thermal insulation and quietness

The aluminium profiles of our roller garage doors are filled with a CFC-free polyurethane foam which provides a good thermal insulation to enhance energy savings, and contributes to a quiet door action.

Quick and easy installation

We want you to benefit from our innovative engineering from the very first moment the door is installed. The operator on our GaraRoll garage door serves as installation aid by lifting the curtain onto the barrel and thus saving valuable installation time.

A full range of products to provide you with convenience, safety and security whilst enhancing the beauty of your home

The garage door is one of the key elements of your property. We offer a wide range of up-and-over doors made of steel, PVC, timber, and GRP as well as steel sectional doors, all along with matching operators, providing the convenience, safety and security you deserve. Our FrontGuard entrance doors complete our product range. Please ask for our detailed brochures, on any of these products.
